

# Small in size. The risk of a big problem.

Inside some electronic devices are button cell batteries that if swallowed can cause severe life-impacting burns or even death.

These batteries can be found in toys, musical books, key fobs, remote controls, calculators, and other small electronic devices.

Ensure your child does not have access to these devices if the battery compartment is not secure.

Make certain that spare batteries are locked away and that used batteries are disposed of safely.

If your child does swallow a button cell battery, seek urgent medical advice *immediately*.
